WETLANDS & BASIN TESTIMONIAL FOR BITU-MILL

Dear Jarrod,

We are happy to provide this reference letter for the works undertaken at the Pillar Road Retarding Basin in Wyndham Vale undertaken for Melbourne Water, WILCON Projects and our collective stakeholders.

As you are aware, the project involved a competitive tender process to construct the retarding basin at Melbourne Water and ANCOLD engineering standards. The project included significant excavation with large machinery, offsite disposal and logistics, removal and reconstruction of a 5 barrel pipe floodway and spillway structure, concrete cut-off weirs, rock beaching and construction of new embankments with filter trenches.

We found that the Bitu-mill team:

- Were very well resourced;
- Managed time and weather risk through hard work and great planning;
- Communicated very well and with transparency;
- Were fair and value focused, ensuring all works were completed within budget with no surprises;
- Provided great technical knowledge and handed over a high quality project; and
- Maintained the site and Melbourne Water asset to a high standard including follow-up visits.

Bitu-mill kept a clean, presentable and productive site at all times so progress meetings with stakeholders were efficient and effective with clear evidence of consistent progress.

The works undertaken by Bitu-mill exceeded our expectations and based on the performance, we would be happy to recommend you to others in the industry

Should you have any queries, please do not hesitate to contact me on [REDACTED]

Yours sincerely,

A handwritten signature in black ink, appearing to read 'KW', written over a white background.
